

Public Notice

Water System Maintenance October 7th, 2024 through October 18th, 2024 8:00 am – 5:00 pm daily

The Delaware Township Municipal Utilities Authority will be performing routine water system maintenance during the month of October. This work involves testing valves and hydrants to ensure system reliability.

Flushing of hydrants is necessary to maintain optimal water quality and fire protection service. During flushing activities, customers may experience temporary fluctuations in pressure and/or discoloration of their water.

If you experience discolored water, run your cold water tap until the water clears. During periods of discoloration, postpone washing clothes and limit your use of hot water.

If you have any questions, please contact Dianne Rankin, DTMUA Secretary, at (908) 782-9601 or Jens Riedel, Natural Systems Utilities, at (908) 431-7068. Thank you for your cooperation.
